

Enhancing Grid Infrastructures with
Virtualization and Cloud Technologies

Website Operational

Milestone MS6 (V1.1)
1 September 2010

Abstract

The StratusLab project website <http://www.stratuslab.eu/> is operational. The website is used for external communication and internal collaboration.

StratusLab is co-funded by the
European Community's Seventh
Framework Programme (Capacities)
Grant Agreement INFSO-RI-261552.

Milestone Report

The StratusLab project website <http://www.stratuslab.eu/> is operational. The website provides or links to:

- StratusLab project news;
- Project presentations and events;
- Media coverage of the project;
- Source code, software and virtual appliance repositories;
- Project documentation;
- Contact information; and
- Internal project information for project members.

The website for the StratusLab FP7 project was inherited from the preceding StratusLab collaboration. The URL <http://www.stratuslab.org/> was used for the earlier site and while this URL is still active, <http://www.stratuslab.eu/> is preferred for the EU FP7 project.

The website is hosted at CNRS/LAL and the public content is managed by TCD. StratusLab project members can contribute to the website through a content management system.

Future Plans

A number of additions and improvements are planned for the website:

- Better use of RSS feeds to provide project news (by M6);
- Integration with social media such as Twitter (by M9).

We plan to collect statistics and feedback for the web site. To collect statistics we will make use of Google Analytics or a similar system. This will allow us to see where site visitors are coming from and what they are interested in. This will be implemented by project month 6.

In addition, it may be useful to provide a mechanism for users to leave feedback on the site e.g. with a comment box or 'I found this useful' button on each page (by M12).
